9	Annexure II (List of Trade experts)	56

1. COURSE INFORMATION

During the two-year duration a candidate is trained on subjects Professional Skill, Professional Knowledge, Engineering Drawing, Workshop Science & Calculation and Employability Skill related to job role. In addition to this a candidate is entrusted to make/do project work and Extra Curricular Activities to build up confidence. The practical skills are imparted in simple to complex manner & simultaneously theory subject is taught in the same fashion to apply cognitive knowledge while executing task. The practical part starts with basic fitting with tolerance level \pm 0.5mm and finally to \pm 0.02mm and angular tolerance from 1° to 10' at the end of the course. The broad components covered under Professional Skill subject are as below:

FIRST YEAR: The practical part starts with basic fitting in the beginning and the candidate also imparted training on allied trades viz., Sheet Metal, Welding (Gas & Arc) which leads to multi-skilling. In the basic fitting the skills imparted are sawing, filing, marking, chipping, measurement, riveting, soldering, brazing, drilling and observation of all safety aspects is mandatory. The accuracy achieved is of±0.25 mm. The safety aspects cover components like OSH & E, PPE, Fire extinguisher, First Aid and in addition 5S being taught.

Different drilling operations (through, blind, angular), reaming, offhand grinding, tapping, dieing, different fits viz., sliding fit, etc., scraping, fastening (nuts & bolts, riveting, studs, screws, etc.,). The accuracy achieved is of ± 0.04 mm and angular accuracy to 30minutes. Different turning operations on lathe (step, grooving, chamfering, drilling, boring, knurling & threading), simple repair, overhauling and lubrication work on machine are being taught in the practical.

SECOND YEAR: Power tool operation, different complex assembling and fitting, fastening, lapping, making gauges, pipe works and pipe joints, Dismantling, overhauling& assembling valves are covered. The accuracy achieved is of an accuracy of ± 0.02 mm & 10 minutes.

Making & using drill jigs, making of critical components, repair & maintenance of power transmission system, making of template & complex gauges, identify different Pneumatic & hydraulic components and circuit construction, repair & maintenance of machinery like lathe, drill, grinding, bench drilling, Inspection of Machine tools, Accuracy testing of Machine tools and erection of simple machines are being performed as part of practical training.

Professional Knowledge subject is simultaneously taught in the same fashion to apply cognitive knowledge while executing task. In addition components like Physical properties of engineering materials, Interchangeability, Method of expressing tolerance as per BIS Fits,

different types of iron, properties and uses, special files, honing, Metallurgical and metal working processes such as Heat treatment, the various coatings used to protect metals, different bearing, working material with finished surface as aluminium, duralumin and stainless steel, topics related to non-ferrous metals, Method of lubrication are also covered under theory part.

Total three projects need to be completed by the candidates in a group. In addition to above components the core skills components viz., Workshop calculation & science, Engineering drawing, employability skills are also covered. These core skills are essential skills which are necessary to perform the job in any given situation.

2.1 GENERAL

The Directorate General of Training (DGT) under Ministry of Skill Development &Entrepreneurship offers a range of vocational training courses catering to the need of different sectors of economy/ Labour market. The vocational training programmes are delivered under the aegis of Directorate General of Training (DGT). Craftsman Training Scheme (CTS) with variants and Apprenticeship Training Scheme (ATS) are two pioneer schemes of DGT for strengthening vocational training.

Fitter trade under CTS is one of the most popular courses delivered nationwide through network of ITIs. The course is of two years duration. It mainly consists of Domain area and Core area. The Domain area (Trade Theory & Practical) impart professional skills and knowledge, while Core area (Workshop Calculation science, Engineering Drawing and Employability Skills) imparts requisite core skills, knowledge and life skills. After passing out of the training program, the trainee is awarded National Trade Certificate (NTC) by DGT which is recognized worldwide.

Candidates broadly need to demonstrate that they are able to:

- Read & interpret technical parameters/document, plan and organize work processes, identify necessary materials and tools;
- Perform task with due consideration to safety rules, accident prevention regulations and environmental protection stipulations;
- Apply professional skill, knowledge, core skills & employability skills while performing jobs.
- Check the job/assembly as per drawing for functioning, identify and rectify errors in job/assembly.
- Document the technical parameters related to the task undertaken.

2.2 PROGRESSION PATHWAYS:

- Can join industry as Technician and will progress further as Senior Technician, Supervisor and can rise to the level of Manager.
- Can become Entrepreneur in the related field.
- Can appear in 10+2 examination through National Institute of Open Schooling (NIOS) for acquiring higher secondary certificate and can go further for General/ Technical education.

- Can take admission in diploma course in notified branches of Engineering by lateral entry.
- Can join Apprenticeship programme in different types of industries leading to National Apprenticeship certificate (NAC).
- Can join Crafts Instructor Training Scheme (CITS) in the trade for becoming instructor in ITIs.
- Can join Advanced Diploma (Vocational) courses under DGT as applicable.

2.3 COURSE STRUCTURE:

Table below depicts the distribution of training hours across various course elements during a period of two years: -

S No.	Course Element	Notional Training Hours		
5 NO.	Course Element	1 st Year	2 nd Year	
1	Professional Skill (Trade Practical)	1000	1000	
2	Professional Knowledge (Trade Theory)	280	360	
3	Workshop Calculation & Science	80	80	
4	Engineering Drawing	80	80	
5	Employability Skills	160	80	
	Total	1600	1600	

2.4 ASSESSMENT & CERTIFICATION:

The trainee will be tested for his skill, knowledge and attitude during the period of course through formative assessment and at the end of the training programme through summative assessment as notified by the DGT from time to time.

a) The **Continuous Assessment (Internal)** during the period of training will be done by **Formative assessment method** by testing for assessment criteria listed against learning outcomes. The training institute has to maintain individual *trainee portfolio* as detailed in assessment guideline. The marks of internal assessment will be as per the formative assessment template provided on <u>www.bharatskills.gov.in</u>.

b) The final assessment will be in the form of summative assessment method. The All India Trade Test for awarding NTC will be conducted by Controller of examinations, DGT as per the guidelines. The pattern and marking structure are being notified by DGT from time to time. The learning outcome and assessment criteria will be basis for setting question papers for final assessment. The examiner during final examination will also check individual trainee's profile as detailed in assessment guideline before giving marks for practical examination.

2.4.1 PASS REGULATION

For the purposes of determining the overall result, weightage of 100% is applied for six months and one-year duration courses and 50% weightage is applied to each examination for two years courses. The minimum pass percent for Trade Practical and Formative assessment is 60% & for all other subjects are 33%. There will be no Grace marks.

2.4.2 ASSESSMENT GUIDELINE

Appropriate arrangements should be made to ensure that there will be no artificial barriers to assessment. The nature of special needs should be taken into account while undertaking assessment. Due consideration should be given while assessing for teamwork, avoidance/reduction of scrap/wastage and disposal of scarp/wastage as per procedure, behavioral attitude, sensitivity to environment and regularity in training. The sensitivity towards OSHE and self-learning attitude are to be considered while assessing competency.

Assessment will be evidence based comprising the following:

- Job carried out in labs/workshop
- Record book/ daily diary
- Answer sheet of assessment
- Viva-voce
- Progress chart
- Attendance and punctuality
- Assignment
- Project work

Evidences and records of internal (Formative) assessments are to be preserved until forthcoming examination for audit and verification by examination body. The following marking pattern to be adopted while assessing:

Performance Level	Evidence
(a) Weightage in the range of 60 -75% to be allot	ted during assessment
For performance in this grade, the candidate	• Demonstration of good skill in the use
with occasional guidance and showing due	of hand tools, machine tools and
regard for safety procedures and practices, has	workshop equipment
produced work which demonstrates	• 60-70% accuracy achieved while

attainment of an acceptable standard of craftsmanship.	 undertaking different work with those demanded by the component/job/set standards. A fairly good level of neatness and consistency in the finish Occasional support in completing the project/job.
(b)Weightage in the range of above75% - 90% to	be allotted during assessment
For this grade, the candidate, with little guidance and showing due regard for safety procedures and practices, has produced work which demonstrates attainment of a reasonable standard of craftsmanship.	 Good skill levels in the use of hand tools, machine tools and workshop equipment 70-80% accuracy achieved while undertaking different work with those demanded by the component/job/set standards. A good level of neatness and consistency in the finish Little support in completing the project/job
(c) Weightage in the range of above 90% to be a	llotted during assessment
For performance in this grade, the candidate, with minimal or no support in organization and execution and with due regard for safety procedures and practices, has produced work which demonstrates attainment of a high standard of craftsmanship.	 High skill levels in the use of hand tools, machine tools and workshop equipment Above 80% accuracy achieved while undertaking different work with those demanded by the component/job/set standards. A high level of neatness and consistency in the finish. Minimal or no support in completing the project.

Fitter General; Sizes metal parts to close tolerances and fits and assembles them using hand tools for production or repairs of machines, or other metal products. Studies drawings to understand specification of different parts, fittings or assembles to be made and their functions. They select materials, appropriate tool and equipments to carry out their work. Holds the work in Vice, Cuts and shapes required parts to dimensions and specifications by processes of sawing, chipping, filing, grinding, drilling holes, screw cutting, scrapping etc., using hand tools for making specimens or finished components. Measures object while working using foot rules, calipers, micrometer, gauges etc. and checks for correct filing with square. Gets half-finished object marked or marks it himself using face plate, marking block scriber, vernier, height gauges, vee-blocks, angle plate, sine plate, slip gauges, combination set, etc. depending on accuracies required, to indicate guide lines for finished sizes, holes to be drilled and pitch centres, threads to be cut and other working details as specified in drawing or sample. Clamps object securely in correct position in vice and files it to required dimensions according to punch marks and guide lines frequently measuring it with calipers, micrometre, vernier, gauges etc, makes holes with drill, cuts threads with taps and dies ensuring that they are square or at required angle to base. Measures finished article with dial indicator, micrometre, vernier, height gauges, screw gauges, plug gauges, sine bar, slip gauge, etc according to prescribed accuracies. May make parts separately and assemble those with screws, rivets, pins, etc. as specified so as to make complete unit according to drawing. Dismantles or removes worn out, broken or defective parts using hand tools or power tools and replaces them by repaired or new ones. Performs repairing and maintenance work (including preventive maintenance) of simple machines, dismantles and replaces different components to construct circuit of Pneumatics and Hydraulics. Tests completed article/ assembly to ensure correct performance. May do simple turning of parts on machines and perform welding, brazing, and like operations. May explain heat treatment processes viz., annealing, hardening, tempering etc. May specialize in particular type of machine or product and be designated accordingly. May suggest alterations.

In addition, Fitter have the ability to visualize the job, good coordination, mechanical attitude, manual dexterity and perform work related mathematical calculations.

Plan and organize assigned work and detect & resolve issues during execution. Demonstrate possible solutions and agree tasks within the team. Communicate with required clarity and understand technical English. Sensitive to environment, self-learning and productivity.

May be designated as FITTER General according to nature of work done.

4. GENERAL INFORMATION

Name of the Trade	FITTER	
Trade Code	DGT/1002	
NCO - 2015	7233.0100, 7233.0200	
NSQF Level	Level – 5	
Duration of Craftsmen Training	Two years (3200 Hours)	
Entry Qualification	Passed 10 th class examination with Science and Mathematics or its equivalent.	
Minimum Age	14 years as on first day of academic session.	
Eligibility for PwD	LD, LC, DW, AA, LV, DEAF	
Unit Strength (No. Of Student)	20 (There is no separate provision of supernumerary seats)	
Space Norms	88 Sq.m	
Power Norms	3.51 KW	
Instructors Qualification for		
1. Fitter Trade	B.Voc/Degree in Mechanical Engineering from AICTE/UGC recognized Engineering College/ university with one-year experience in the relevant field.	
	03 years Diploma in Mechanical Engineering from AICTE /recognized board of technical education or relevant Advanced Diploma (Vocational) from DGT with two years' experience in the relevant field.	
	OR	
	NTC/NAC passed in the Trade of "Fitter" With three years'	
	experience in the relevant field.	
	Essential Qualification:	
	Relevant National Craft Instructor Certificate (NCIC) in any of the	

	variants under DGT.		
	Note: Out of two instructors required for the unit of 2(1,1) and		
	Note:- Out of two instructors required for the unit of 2(1+1), one must have Degree (Diploma and other must have NTC (NAC		
	must have Degree/Diploma and other must have NTC/NAC		
	qualifications. However, both of them must possess NCIC in any		
2 Workshop	B Voc/Degree in Engineering from AICTE/UCC recognized

Learning outcomes are a reflection of total competencies of a trainee and assessment will be carried out as per the assessment criteria.

5.1 LEARNING OUTCOMES (TRADE SPECIFIC)

FIRST YEAR:

- Plan and organize the work to make job as per specification applying different types of basic fitting operation and Check for dimensional accuracy following safety precautions. [Basic fitting operation – Marking, Hacksawing, Chiselling, Filing, Drilling, Taping and Grinding etc. Accuracy: ± 0.25mm]
- 2. Manufacture simple sheet metal items as per drawing and join them by soldering, brazing and riveting.
- 3. Join metal components by riveting observing standard procedure.
- 4. Join metal component by arc welding observing standard procedure.
- 5. Cut and join metal component by gas (oxyacetylene)
- Produce components by different operations and check accuracy using appropriate measuring instruments. [Different Operations - Drilling, Reaming, Taping, Dieing; Appropriate Measuring Instrument – Vernier, Screw Gauge, Micrometer]
- Make different fit of components for assembling as per required tolerance observing principle of interchange ability and check for functionality. [Different Fit – Sliding, Angular, Step fit, 'T' fit, Square fit and Profile fit; Required tolerance: ±0.04 mm, angular tolerance: 30 min.]
- 8. Produce components involving different operations on lathe observing standard procedure and check for accuracy. [Different Operations facing, plain turning, step turning, parting, chamfering, shoulder turn, grooving, knurling, boring, taper turning, threading (external 'V' only)]
- 9. Plan & perform simple repair, overhauling of different machines and check for functionality. [Different Machines Drill Machine, Power Saw, Bench Grinder and Lathe]

SECOND YEAR:

 Make & assemble components of different mating surfaces as per required tolerance by different surface finishing operations using different fastening components, tools and check functionality. [Different Mating Surfaces – Dovetail fitting, Radius fitting, Combined fitting; Different surface finishing operations – Scraping, Lapping and

Honing; Different fastening components – Dowel pins, screws, bolts, keys and cotters; Different fastening tools-hand operated & power tools, Required tolerance \pm 20.02mm, angular tolerance \pm 10 min.]

- Make different gauges by using standard tools & equipment and checks for specified accuracy. [Different Gauges – Snap gauge, Gap gauge; Specified Accuracy - ±0.02mm]
- 12. Apply a range of skills to execute pipe joints, dismantle and assemble valves & fittings with pipes and test for leakages. [Range of skills Cutting, Threading, Flaring, Bending and Joining]
- 13. Make drill jig & produce components on drill machine by using jigs and check for correctness.
- 14. Plan, dismantle, repair and assemble different damaged mechanical components used for power transmission & check functionality. [Different Damage Mechanical Components Pulley, Gear, Keys, Jibs and Shafts.]
- Identify, dismantle, replace and assemble different pneumatics and hydraulics components. [Different components – Compressor, Pressure Gauge, Filter Regulator Lubricator, Valves and Actuators.]
- 16. Construct circuit of pneumatics and hydraulics observing standard operating procedure & safety aspect.
- 17. Plan & perform basic day to day preventive maintenance, repairing and check functionality. [Simple Machines Drill Machine, Power Saw and Lathe]
- Plan, erect simple machine and test machine tool accuracy. [Simple Machines Drill Machine, Power Saw and Lathe]

6. ASSESSMENT CRITERIA

	LEARNING OUTCOMES	ASSESSMENT CRITERIA			
	FIRST YEAR				
1.	Plan and organize the work to make job as per	Plan & Identify tools, instruments and equipment for marking and make this available for use in a timely manner.			
	specification applying	Select raw material and visual inspect for defects.			
	different types of basic fitting operation and Check	Mark as per specification applying desired mathematical calculation and observing standard procedure.			
	for dimensional accuracy following safety	Measure all dimensions in accordance with standard specifications and tolerances.			
	precautions. [Basic fitting operation – marking,	Identify Hand Tools for different fitting operations and make these available for use in a timely manner.			
	Hacksawing, Chiselling, Filing, Drilling, Taping and	Prepare the job for Hacksawing, chiselling, filing, drilling, tapping, grinding.			
	Grinding etc. Accuracy: ± 0.25mm]	Perform basic fitting operations viz., Hacksawing, filing, drilling, tapping and grinding to close tolerance as per specification to make the job.			
		Observe safety procedure during above operation as per standard norms and company guidelines.			
		Check for dimensional accuracy as per standard procedure.			
		Avoid waste, ascertain unused materials and components for disposal, store these in an environmentally appropriate manner and prepare for disposal.			
2. Manu meta and j	Manufacture simple sheet metal items as per drawing and join them by soldering,	Identify Hand Tools for Sheet Metal work, Soldering, Brazing & riveting and make these available for use in a timely manner.			
	brazing and riveting.	Mark and develop various forms as per drawing using sheet metals.			
		Make of simple items with sheet metal as per drawing.			
		Prepare the job for Soldering, Brazing &riveting.			
		Identify different type of rivets and use as per requirement.			
		Identify tools for drilling and use these tools.			
		Mark according to drawing.			
		Drill through holes on the job.			
		Solder, Braze and Rivet to prepare a job as per given			

	drawing / sample following standard practices.
	Observe safety procedure during riveting as per standard
	norms and company guidelines.
3. Join metal components by	Identify Tools and equipments for riveting and make these
riveting observing	available for use in a timely manner.
standard procedure.	Prepare the job for lap and butt joint.
	Identify different type of rivets and use as per requirement.
	Identify tools for drilling and use these tools.
	Mark according to drawing.
	Drill through holes on the job.
	Rivet to prepare a job as per given drawing / sample
	following standard practices.
	Observe safety procedure during riveting as per standard
	norms and company guidelines.
4. Join metal component by	Identify different components/parts of arc welding
arc welding observing	machine, collect desired information and set each
standard procedure.	components/parts as per standard procedure.
	Observe safety/ precaution during operation.
	Select appropriate material & plan for arc welding.
	Weld metal parts / mechanical components as per
	specification observing standard procedure.
	Check joined part portion to ascertain proper welding.
5. Cut and join meta	Identify different components/parts of Gas (oxyacetylene)
component by gas	machine, collect desired information and set each
(oxyacetylene).	components/parts as per standard procedure.
	Observe safety/ precaution during operation.
	Select appropriate material & plan for gas cutting & joining
	operation.
	Cut & join metal parts / mechanical components as per
	specification observing standard procedure.
	Check cut portion/ joined part to ascertain proper welding.
6. Produce components by	Ascertain and select tools and materials for the job and
different operations and	make this available for use in a timely manner.

check accuracy using	Plan work in compliance with standard safety norms.
appropriate measuring	Produce component by observing standard procedure.
instruments.[Different	Check the dimensions of the produced components to
Operations - Drilling,	ensure dimensions are within prescribed limit.
Reaming, Taping, Dieing;	Avoid waste, ascertain unused materials and components
Appropriate Measuring	for disposal, store these in an environmentally appropriate
Instrument – Vernier,	manner and prepare for disposal.
Screw Gauge, Micrometer]	
7. Make different fit of	Recognize general concept of Limits, Fits and tolerance
components for	necessary for fitting applications and functional application
assembling as per required	of these parameters.
tolerance observing	Ascertain and select tools and materials for the job and
principle of	make this available for use in a timely manner.
interchangeability and	Set up workplace/ assembly location with due
check for functionality.	consideration to operational stipulation
[Different Fit – Sliding,	Plan work in compliance with standard safety norms and
Angular, Step fit, 'T' fit,	collecting desired information.
Square fit and Profile fit;	Demonstrate possible solutions and agree tasks within the
Required tolerance: ±0.04	team.
mm, angular tolerance: 30	Make components according to the specification for
min.]	different fit using a range of practical skills and ensuring
	interchangeability of different parts.
	Assemble components applying a range of skills to ensure
	proper fit.
	Check functionality of components.
8. Produce components	Ascertain basic working principles and safety aspect of
involving different	lathe machine.
operations on lathe	Understand functional application of different levers,
observing standard	stoppers, adjustment etc.
procedure and check for	Identify different lubrication points and lubricants, their
accuracy. [Different	usage for application in lathe machine as per machine
Operations – facing, plain	manual.
turning, step turning,	Identify different work and tool holding devices and collect
parting, chamfering,	information for functional application of each device.
shoulder turn, grooving,	Mount the work and tool holding devices with required

knurling, boring, taper	alignment and check for its functional usage to perform
turning, threading	lathe operations.
(external 'V' only)]	Solve problem by applying basic methods, tools, materials
	and information during setting.
	Observe safety procedure during mounting as per standard
	norms.
	Produce components observing standard procedure.
	Check accuracy/ correctness of job using appropriate
	equipment/gauge.
	Avoid waste, ascertain unused materials and components
	for disposal, store these in an environmentally appropriate
	manner and prepare for disposal.
9. Plan&perform simple	Ascertain and select tools and materials for the repair,
repair, <i>overhauling</i> of	overhauling and make this available for use in a timely
different machines and	manner.
check for functionality.	Plan work in compliance with standard safety norms.
[Different	Demonstrate possible solutions and agree tasks within the
Machines – Drill Machine,	team.
Power Saw, Bench Grinder	Select specific parts to be repaired and ascertain for
and LatheJ	appropriate material and estimated time.
	Repair, overhaul and assemble the parts in the machine
	with the help of blueprint.
	Check for functionality of part and ascertain faults of the
	part/ machine in case of improper function.
	Rectify faults of assembly.
	SECOND YEAR
10. Make &assemble	Ascertain and select tools and materials for the job and
components of different	make this available for use in a timely manner.
mating <i>surfaces</i> as per	Plan work in compliance with standard and collecting
required tolerance by	necessary information.
different surface finishing	Set up workplace/ assembly location with due
operations using different	consideration to operational stipulation
fastening components,	Demonstrate possible solutions and agree tasks within the
tools and check	team.
functionality.	Produce different components with appropriate accuracy
Different Mating Surfaces	by observing standard procedure& method as per

– Dovetail fitting, Radius	specification using appropriate tools & machines.
fitting, Combined fitting;	Perform scraping and lapping of components to obtain
Different surface finishing	required surface finish of different mating surface.
operations – Scraping,	Comply with safety rules when performing the above
Lapping and Honing;	operations.
Different fastening	Check tolerance and accuracy of components as defined
components – Dowel pins,	with appropriate instruments observing standard
screws, bolts, keys and	procedure.
cotters; Different fastening	Assemble different components using different fastening
tools-hand operated &	components, tools and check the functionality.
power tools, Required	
tolerance - ±0.02mm,	
angular tolerance ± 10	
min.]	
11. Make different gauges by	Ascertain and select tools and materials for the job and
using standard tools &	make this available for use in a timely manner.
equipment and checks for	Plan work in compliance with standard safety norms.
specified accuracy.	Produce gauge by observing appropriate method and as per
[Different Gauges – Snap	specification of drawing.
gauge, Gap gauge;	Perform Lapping of gauge to obtain required finish as per
Specified Accuracy -	drawing.
±0.02mm]	Check tolerance and specified accuracy of gauge with
	appropriate measuring instruments as per drawing.
	Avoid waste, ascertain unused materials and components
	for disposal, store these in an environmentally appropriate
	manner and prepare for disposal.
12. Apply a range of skills to	Ascertain and select tools and materials for the job and
execute pipe joints,	make this available for use in a timely manner.
dismantle and assemble	Plan to Dismantle and assemble valves and pipe fittings.
valves & fittings with pipes	Dismantle valves and fittings in pipes applying range of
and test for	skills andcheck for defect as per standard procedure.
leakages.[Range of skills –	Demonstrate possible solutions in case of defect and agree
Cutting, Threading,	tasks within the team for repair or replacement.
Flaring, Bending and	Assemble valves and various pipe fittings using range of
Joining]	skills and observing standard procedure.

	Test for leakage and appropriate functioning of valves.		
	Avoid waste, ascertain unused materials and components		
	for disposal, store these in an environmentally appropriate		
	manner and prepare for disposal.		
13. Make drill jig & produce	Set up workplace/ assembly location with due		
components on drill	consideration to operational stipulation		
machine by using jigs and	Ascertain and select tools and materials for the job and		
check for correctness.	make this available for use in a timely manner.		
	Collect information related to standard procedure,		
	methods and tools to make drill jigs.		
	Mark the components as per drawing.		
	Make drill jigs by turning, drilling, reaming, filing, taping,		
	etc.		
	Test the functionality of jig.		
	Select suitable jigs for drilling considering desired result		
	and collecting necessary information.		
	Produce component by using jig observing standard		
	procedure and check the correctness of the job.		
	Comply with safety rules when performing the above		
	operations.		
14. Plan, dismantle, repair and	Select and ascertain tools and materials for the job and		
assemble different	make this available for use in a timely manner.		
damaged mechanical	Plan to dismantle, repair and assemble mechanical		
components used	components used for power transmission as per drawing		
for power transmission &	and collecting necessary information.		
check functionality.	Perform dismantling and appropriate repairing of		
[Different Damage	mechanical components with accuracy applying range of		
Mechanical Components –	skills and appropriate repairing processes.		
Pulley, Gear, Keys, Jibs and	Check the accuracy of the repaired components with		
Shafts.]	appropriate gauge & instruments.		
	Assemble the repaired mechanical components observing		
	standard procedure.		
	Comply with safety rules when performing the above		
	operations.		
	Check different parameters of power transmission e.g.		

	R.P.M, slackness of belts, matching of gears/ clutches, loss		
	of RPM etc.		
	Check for functionality of power transmission system or		
	any assembly as per standard parameters.		
15. Identify, dismantle, replace	Select and ascertain tools for the job and make this		
and assemble different	available for use in a timely manner.		
pneumatics and hydraulics	Identify different pneumatics and hydraulics components.		
components. [Different	Plan to dismantle and replace pneumatics & hydraulics		
components – Compressor,	circuit as per drawing and collecting necessary information.		
Pressure Gauge, Filter	Perform dismantling and replacing of different components		
Regulator Lubricator,	with accuracy applying range of skills and standard

7. TRADE SYLLABUS

SYLLABUS FOR FITTER TRADE				
	FIRST YEAR			
Duration	Reference Learning Outcome		Professional Skills (Trade Practical) with Indicative Hours	Professional Knowledge (Trade Theory)
Professional Skill 250 Hrs; Professional Knowledge 70 Hrs	Plan and organize the work to make job as per specification applying different types of basic fitting operation and Check for dimensional accuracy following safety precautions. [Basic fitting operation – marking, Hacksawing, Chiseling, Filing, Drilling, Taping and Grinding etc. Accuracy: ± 0.25mm]	 1. 2. 3. 4. 5. 6. 7. 8. 	Importance of trade training, List of tools & Machinery used in the trade. (1 hr.) Safety attitude development of the trainee by educating them to use Personal Protective Equipment (PPE). (5 hrs.) First Aid Method and basic training. (2 hrs.) Safe disposal of waste materials like cotton waste, metal chips/burrs etc. (2 hrs.) Hazard identification and avoidance. (2 hrs.) Safety signs for Danger, Warning, caution & personal safety message. (1 hrs.) Preventive measures for electrical accidents & steps to be taken in such accidents. (2 hrs.) Use of Fire extinguishers. (7 hrs.)	All necessary guidance to be provided to the new comers to become familiar with the working of Industrial Training Institute system including stores procedures. Soft Skills, its importance and Job area after completion of training. Importance of safety and general precautions observed in the in the industry/shop floor. Introduction of First aid. Operation of electrical mains and electrical safety. Introduction of PPEs. Response to emergencies e.g.; power failure, fire, and system failure. Importance of housekeeping & good shop floor practices. Introduction to 5S concept & its application. Occupational Safety & Health: Health, Safety and Environment guidelines,
		9.	Practice and understand precautions to be	legislations ®ulations as applicable.

	followed while working in	
		Desire advector d'un establist
	fitting jobs. (2 nrs.)	Basic understanding on Hot
	10. Safe use of tools and	work, confined space work
	equipments used in the	and material handling
	trade. (1 hrs.)	equipment. (07 hrs.)
	11. Identification of tools	Linear measurements- its
	&equipment as per desired	units, dividers, calipers,
	specifications for marking	hermaphrodite, centre punch,
	& sawing. (5 hrs.)	dot punch, prick punch their
	12. Selection of material as per	description and uses of
	application. (1 hrs.)	different types of hammers.
	13. Visual inspection of raw	Description, use and care of
	material for rusting,	'V' Blocks, marking off table.
	scaling, corrosion etc. (1	Measuring standards (English.
	hrs.)	Metric Units), angular
	14. Marking out lines, gripping	measurements.

	dimensions (10 hrs.)	
	15 Sowing different types of	
	15. Sawing unterent types of	
	sections. (8 nrs.)	
	16. Filing Channel, Parallel. (5	Bench vice construction,
	hrs.)	types, uses, care &
	17. Filing- Flat and square	maintenance, vice clamps,
	(Rough finish), (10 hrs.)	hacksaw frames and blades,
	18. Filing practice, surface	specification, description,
	filing, marking of straight	types and their uses, method
	and parallel lines with odd	of using hacksaws.
	leg calipers and steel rule.	Files- specifications,
	(5 hrs.)	description, materials, grades,
	19. Marking practice with	cuts, file elements, uses.
	dividers, odd leg calipers	Types of files, care and
	and steel rule (circles,	maintenance of files.
	ARCs, parallel lines).	Measuring standards (English.
	(5 hrs.)	Metric Units). angular
	()	measurements (07 hrs)
	20 Marking off straight lines	Marking off and layout tools
		warking on and layout tools,

and ARCs using scribing dividers, scribing block, -
block and dividers. (5 hrs.) description, classification,
21. Chipping flat surfaces along material, care &
a marked line. (10 hrs.) maintenance.
22. Marking, filing, filing Try square, ordinary depth
square and check using tri gauge, protractor-
square. (10 hrs.) description, uses and cares.
Uses, care & maintenance of
cold chisels- materials, types,
cutting angles. (07 hrs.)
23. Marking according to Marking media, marking blue,
simple blueprints for Prussian blue, red lead, chalk
locating, position of holes, and their special application,
scribing lines on chalked description.
surfaces with marking Use, care and maintenance of
tools. (10 hrs.) scribing block.
24. Finding centre of round bar Surface plate and auxiliary
with the help of 'V' block marking equipment, 'V' block,
and marking block. (3 hrs.) angle plates, parallel block,
25. Joining straight line to an description, types, uses,
ARC. (12 hrs.) accuracy, care and
maintenance. (07 hrs.)
26. Chipping, Chamfering, Chip Physical properties of
slots & oils grooves engineering metal: colour,
(Straight). (08 hrs.) weight, structure, and
27. Filing flat, square, and conductivity, magnetic,
parallel to an accuracy of fusibility, specific gravity.
0.5mm. (07 hrs.) Mechanical properties:
28. Chip curve along a line- ductility, malleability
mark out, keyways at hardness, brittleness,
various angles & cut toughness, tenacity, and
keyways. (1 hrs.) elasticity. (07 hrs.)
29. Sharpening of Chisel. (2
hrs.)
30. File thin metal to an
accuracy of 0.5 mm. (07
hrs.)
31. Saw along a straight line, Power Saw, band saw,

		curved line, on different	Circular saw machines used
		sections of metal. (15 hrs.)	for metal cutting. (07 hrs.)

SYLLABUS FOR CORE SKILLS

- 1. Workshop Calculation & Science (Common for two year) (80Hrs. + 80 Hrs.)
- 2. Engineering Drawing (Common for Group-I (Mechanical Trade Group))(80Hrs. + 80 Hrs.)
- 3. Employability Skills (Common for all CTS trades) (160Hrs. + 80 Hrs.)

Learning outcomes, assessment criteria, syllabus and Tool List of Core Skills subjects which is common for a group of trades, provided separately inwww.bharatskills.gov.in.

73.	Hand Reamer set (Taper pin straight flute)	Nominal Dia. 6, 8, 10, 12, 16mm	1 set
74.	Machine Reamer parallel (Helical flute)	12 - 16mm set of 5.	1 no.
75.	Scraper flat	150 mm	10 nos.
76.	Scraper triangular	150 mm	10 nos.
77.	Scraper half round	150 mm	10 nos.
78.	Chisel cold crosscut& diamond point.	9 mm X 150 mm	10 each
79.	Chisel cold flat	9 mm X 100 mm	10 nos.
80.	Chisel cold round nose	9 mm X 100 mm	10 nos.
81.	Drill chuck with key	12 mm.	1 no.
82.	Pipe wrench	400 mm	1 no.
83.	Pipe vice	100 mm	1 no.
84.	Adjustable pipe die set BSP	cover pipe size 1" or 3/4"	1 Set
85.	Wheel dresser (One for 4 units) Star/Dresser with Holder	Length 150 mm, diamond point	1 no.
86.	Machine vice - Swivel Base	100 mm	1 no.

87.	Machine vice - Swivel Base	125 mm	1 no.
00	Sleeve drill Morse	No. 0 - 1, 1 - 2, 2 - 3, 3 - 4, 4 -	1 Cot
00.		5	1 Set
89.	Vice bench	150 mm	20 nos.
90.	Bench working.	2400 x 1200 x 900 mm	4 nos.
91.	Almirah.	1800 x 900 x 450 mm	2 nos.
92.	Lockers with 8 drawers (standard size).	One locker for each trainee	3 nos.
93.	Metal rack	1820 x 1820 x 450 cm	1 no.
94.	Instructor Table		
95.	Instructor Chair		
96.	Black board with easel.		
97.	Fire extinguisher (For 4 Units)	CO2 type, 3 kg capacity	
98.	Fire buckets.		
99.	Machine vice.	100mm	2 nos.
100.	Wing compass.	254 mm or 300 mm	2 nos.
101.	Hand hammer with handle.	1000 gm	1 nos.
102.	Torque wrench (Standard/Ratchet type)	14 to 68 Nm	1 no.
103.	Power tools for fastening	Capacity 10-18mm	1 No.
104	Different Profile gauges (Plate type) - For		
104.	demonstration	Metric standard	4 nos.
105	Knurling tool (Diamond, straight &		
105.	Diagonal)		1 each
106.	Indexable boring bar with inserts	1" shank	4 nos.
	Machine maintenance manual for Lathe,		1
107.	Pedestal grinder, Drill machine, Power		
	saw		
108.	Temperature gauge	Range 0 - 150°C	1 each
109	Dowel pin (straight)	Dia1" Length -4" (Mat:	
109.		Stainless Steel)	1 each
110	Standard Tap screws	M3, M4, M5, M6, M8, M10,	
110.		M12, M14, M16	1 each
111.	Lapping plate	Dia6"	2 each
	Medium carbon Heat treated alloy steel	M6, M8, M10, M12, M14,	2 each
112	Metric Studs and bolts along with nuts	M16 (Standard)	
112.	(for display) of standard length (May be		
	manufactured in-house)		
113.	Caps screws	M6, M8, M10, M12	2 each
		Letter drill gauge (A to Z),	2 nos.
114	Drill gauges	Number drill gauge (1 to 60),	
		Metric drill gauge (1.5mm to	
		12.5mm, 30 holes)	

115.	Cast Iron Globe Valve (Flanged type)	150NB, Class# 150 Flange: ANSI125-B16.1	2 nos.	
116.	C.I. Sluice / Gate valve (flanged type)	150NB, Class# 150 Flange: ANSI125-B16.1	2 nos.	
117.	Stop cock	25NB (2-way, Threaded end)	2 nos.	
118.	M.S. Pipe	150NB, Sch.40, ERW, IS:1239	as required	
119.	G.I. Pipe	25mm, Sch.40, ERW	as required	
120.	Slip-on Forged steel Flange	150NB, ANSI-B16.5, Class#150	4 nos.	
121.	Bolt & Nut with washer (May be manufactured in-house)	M20x2.5x90Long (part thread - Hex. Head)	20 nos.	
122.	Pipe threading die with handle	Ratchet type Die head of 1/2", 3/4" and 1"	2 nos.	
123.	Jigs & Fixture (sample)-For demonstration (May be manufactured in-house)		1 no.	
124.	Pulleys (for V-belt or Flat belt)	to fit on 50mm dia. Shaft with key slot	1 no.	
125.	Steel keys (May be manufactured in- house)	to fit with key slot of shaft & pulley	2 nos.	
126.	Damaged old spur gear	to fit 50mm dia. Shaft	2 nos.	
127.	V-belt and Flat belt	to fit on pulley	1 each	
128.	Packing gasket	PTFE gasket roll small size	1 no.	
129.	Washer, clutch, keys, jib, cotter &circlip	minimum 25mm size, carbon steel material	2 each	
130.	Hollow punch	Straight Shank Hollow Punch Sets 5-12mm	1 set	
131.	Drill Drift (May be manufactured in- house)	200mm hardened and black finish	2 nos.	
132.	Bearing different types	each type of diameter 25mm (min.)	1 each	
133.	Lifting sling	8mm Nominal Dia. Single leg sling	2 nos.	
134.	Bearing extractor	Universal gear puller 2 or 3 jaws adjustable	1 no.	
135.	Pulley extractor	- do -	1 no.	
С. ТОО	LS FOR ALLIED TRADE - SHEET METAL WOR	KER		
(Note: - Those additional items are to be provided for the Allied Trade Training where the				
Sheet	Metal trade does not exist.)			
136.	Trammel	300 mm	1 no.	
137.	Pocker		2 nos.	
138.	Prick punch	100 mm	2 nos.	

139.	Mallet.	Dia. 100 mm X 150 mm	2 nos.
140.	Aviation Snips straight Cut	300 mm	2 nos.
141.	Flat headed hammers with handle.		2 nos.
142.	Planishing hammer.		2 nos.
143.	Snip bent Left Cut	250 mm	2 nos.
144.	Stake hatchet with Leg.	300 X 200 X 20 mm	2 nos.
145.	Stake grooving.	100 X 100 X 300 mm	2 nos.

l components	

1. All the tools and equipment are to be procured as per BIS specification.

2. For items under #G (List of Tools & Accessories for Pneumatics and Hydraulics), may be installed in the existing workshop for units up to 8 (4+4). For units beyond 8(4+4), separate room (having area: 20 sq. m) for installation of these items is essential.

3. Internet facility is desired to be provided in the classroom.

The DGT sincerely acknowledges contributions of the Industries, State Directorates, Trade Experts, Domain Experts, trainers of ITIs, NSTIs, faculties from universities and all others who contributed in revising the curriculum.

Special acknowledgement is extended by DGT to the following expert members who had contributed immensely in this curriculum.

List of Expert members contributed/ participated for finalizing the course curriculum of

Fitter trade held on 12.01.17 at CSTARI, Kolkata
